

# Desk Drive Assembly Instructions

Parts/Pieces:

(2) Legs

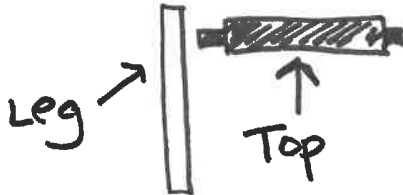

(1) Top

(1) Back Support

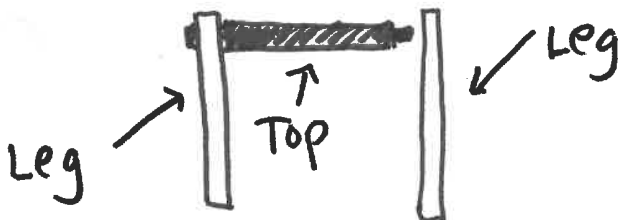

Instructions:

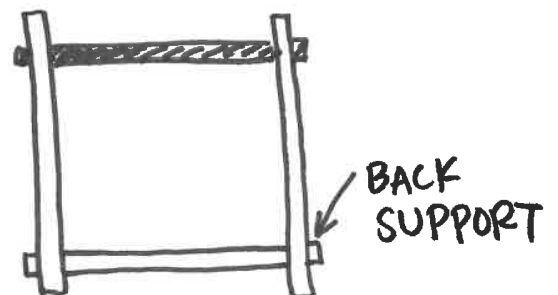

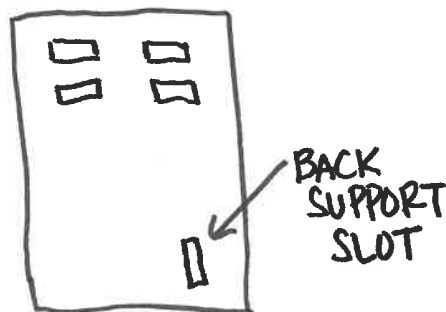

1. Hammer with a rubber mallet (or hammer and scrap wood) the tabletop (CREATE/MSOE sticker side down) into two of the leg slots at the desired height (top slots are for middle school/high school students, lower slots are for elementary students). You will want to lay the desk on its side while hammering.

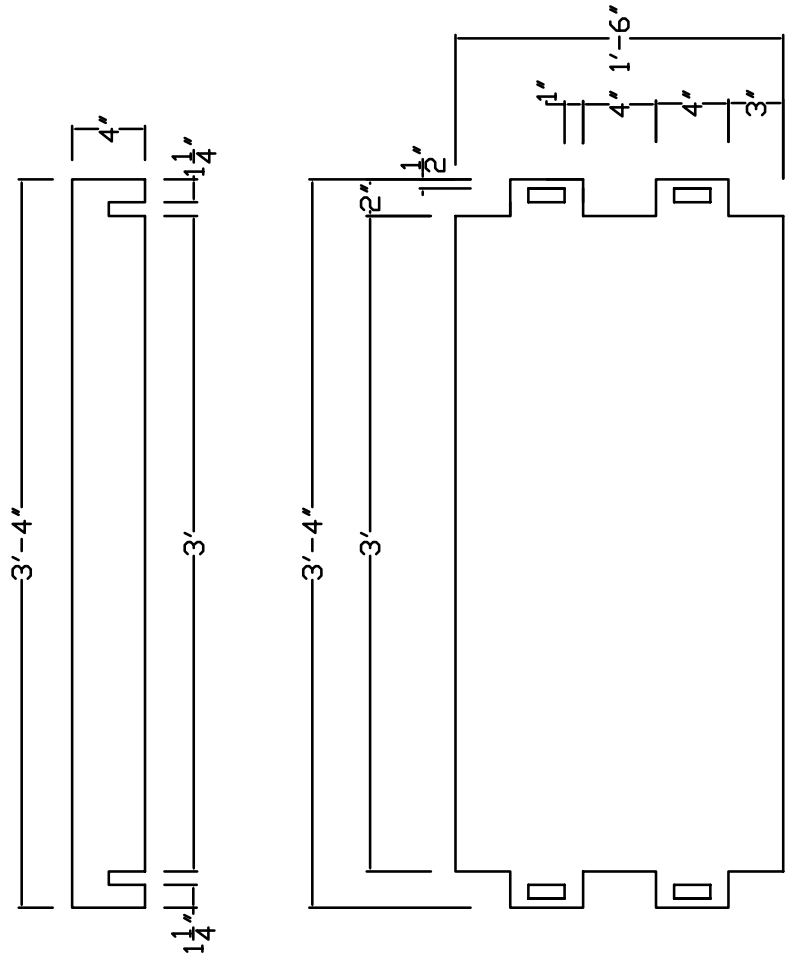

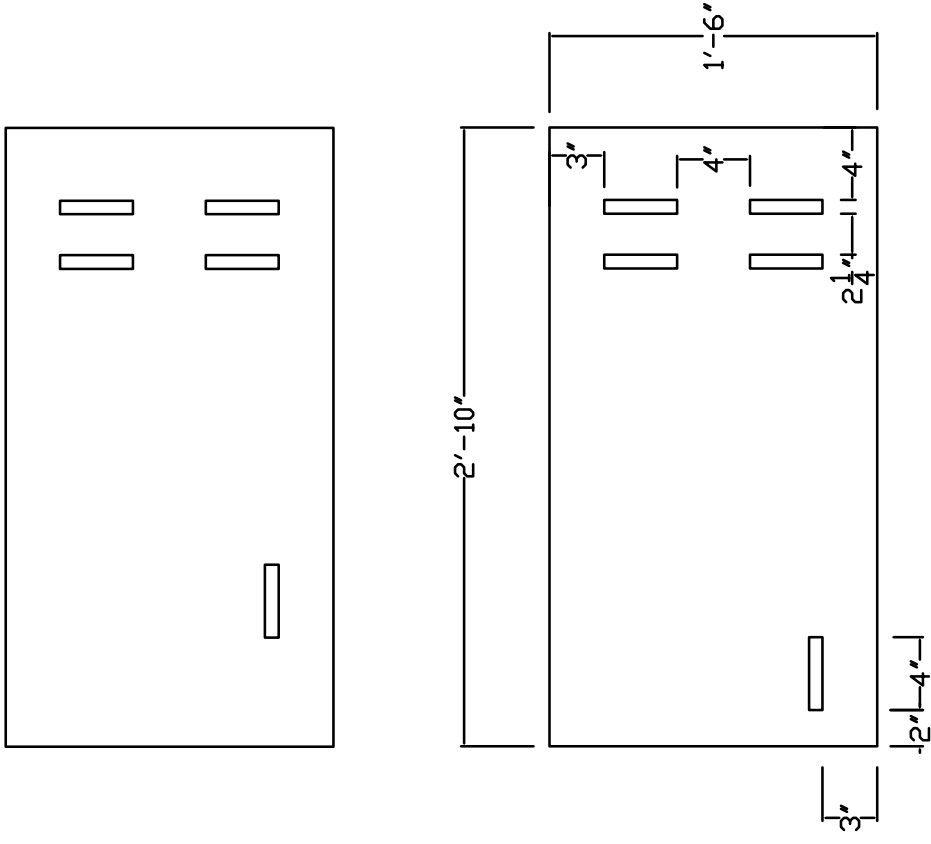

2. Hammer the remaining leg in with the rubber mallet (or hammer and scrap wood).

3. Place the back support in on the back side of the desk. You will need to slide the back support from the outside of one leg, through the middle, and out the other side.
